

A better choice

Our commitment

In 2009 we created our environmental policy. Since then we have made great strides at reducing our impact on the environment. We know we are not perfect and have no interest in greenwashing. We have committed to making continuous steps.

COMMITMENT

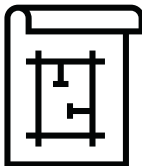

Our waste & recycling

We continually evaluate the products we use and how we can best manage the waste we create. We have a number of recycling procedures in place to reduce off-cuts going to landfill. Our ink and solvent waste is disposed of responsibly.

RECYCLING

Our production

We have been long term adopters of HP Latex printers. We retired our last solvent printer in 2017. We only use water based latex ink and UV curable ink printers. Solvents used for cleaning and preparation are kept to a minimum.

TECHNOLOGY

Our product labels

Products that carry this badge are eligible for NZ based circular economy recycling or are part of a recycling program. We send end of life product and off-cuts for recycling into more product or into an alternative product.

Products that carry this badge are a better choice over a traditionally used product. They may be recyclable, PVC free, free of heavy metals, non toxic or biodegradable among other potential benefits.

Our programmes

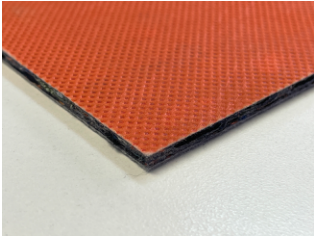

Products are recycled into UV stable premium fence posts. These fence posts are 100% environmentally friendly, diverting thousands of tonnes of waste plastics from national landfill every year. They are certified by Biogro for organic farming.

TEXTILE PRODUCTS

Textile Products is the largest textile waste processing company in NZ. They recycle waste textiles and wool, turning them into eco-friendly products, including protective blankets, insulation materials, and RETEX Board.

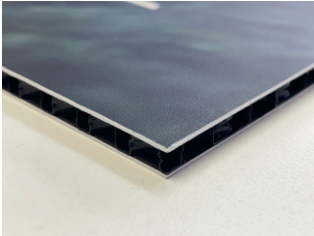

RETEX Board Interior / exterior

What is it? Double sided display board.

Use in place of: Foam PVC, Foamboard and non recyclable board.

Credentials: Made from textiles (recycled workwear & used RETEX Board).

Recycling Programme: Textile Products - return to us.

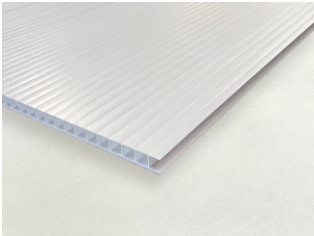

Media Board Interior / exterior

What is it? Double sided premium display board with blackout core.
